**Est. 5-year EPS Growth %:** Estimated percentage increase in earnings per share (EPS) per year of the fund's holdings over the next 5 years. These returns are not guaranteed and may be higher or lower. Source: Wasatch and FactSet. **Trailing 12-mo. P/E Ratio:** The sum of the stock prices of the fund's holdings divided by the aggregate earnings per share of those holdings for the past 12 months, calculated as a weighted harmonic average. **P/E to Growth Rate:** The trailing 12-month P/E ratio divided by the estimated 5-year EPS growth rate. Portfolios with a number less than 1.0 would be considered undervalued, around 1.0 would be considered fair valued and significantly greater than 1.0 would be considered overvalued. **Weighted Average Market Cap:** The average market capitalization of companies held by the fund, weighted by their percentage of fund net assets. **Portfolio Turnover:** A measure of trading activity in a fund's portfolio over the past 12 months expressed as a percentage of the fund's average total assets. **Alpha** measures a fund's risk/reward potential. A positive alpha means the fund outperformed the index. A negative alpha means the fund underperformed the index. **Beta** measures a fund's risk in relation to the market. A beta of 0.8 means the fund's total return is likely to move up or down 80% of the market change; 1.25 means total return is likely to move up or down 25% more than the market. **R-Squared** measures (from 0 to 1.0) how closely a fund's movements are correlated with movements of its benchmark. An R-squared of 1.0 would mean that the fund's movements are completely correlated with the movements of its benchmark.
