Wasatch Advisors is an independent registered investment adviser. Registration does not imply a certain level of skill or training. A complete list of composite descriptions is available upon request.

The Emerging Markets Select Composite contains fully discretionary equity accounts following the Emerging Markets Select style. The composite primarily invests in equity securities of all market capitalizations that are tied economically to emerging market countries with the goal of long-term growth of capital. For comparison purposes the composite is measured against the MSCI Emerging Markets index.

The MSCI Emerging Markets Index is a free float-adjusted market capitalization index designed to measure the equity market performance of emerging markets.

MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. The MSCI data may not be further redistributed or used to create indices or financial products. This report is not approved or produced by MSCI.

Returns include the reinvestment of all income. Net performance was calculated using actual management fees. Some portfolio net-of-fees returns may be net of performance-based fees. Mutual funds are included in this composite. Net returns have been reduced by only the mutual fund management fee. Results are based on fully discretionary accounts under management, including accounts no longer with the firm. The U.S. Dollar is the currency used to express performance. Past performance is not indicative of future results.

Wasatch Advisors withholds taxes from dividends for foreign securities based on the net rate of the dividend. If withholding taxes are not posted to the account at the custodian, Wasatch Advisors will update their system to reflect the full gross amount of the dividend. Index returns are net of foreign withholding tax.

Depending on the account and the investment style, clients may pay an annual fee up to 2.00%. Actual investment advisory fees incurred by clients may vary.

The annual composite dispersion is an equal-weighted standard deviation calculated for the accounts in the composite the entire year.

The three-year annualized ex-post standard deviation is not presented for 2013 and 2014 because 36 monthly returns are not available for the composite and benchmark.

Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.

All portfolios within the composite are valued using WM/Reuters 4 p.m. GMT exchange rates except mutual funds within the composite which use the WM Company/Reuters 4 p.m. EST exchange rates. Fair value factors are applied to the local closing price of foreign holdings under various circumstances. The benchmark is valued using the local close prices and WM Company/Reuters 4 p.m. GMT exchange rates.

The Emerging Markets Select Composite was created January 1, 2013.

Wasatch Advisors claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Wasatch Advisors has been independently verified for the periods January 1, 1995 through December 31, 2018. The verification report(s) is/are available upon request.

Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. Verification does not ensure the accuracy of any specific composite presentation.
